

OPEN helps family doctors with online access for patients

Viewing your medical data at home How does it work?

1

You are with the family doctor.

2

The doctor examines you.

The doctor gives advice.

Sometimes you get medication.

3

In her computer the doctor adds everything to your medical data.

4

You can also read this yourself, on your own computer or phone.

5

You log in with your own password.
Only you and your doctor are able to see your data.

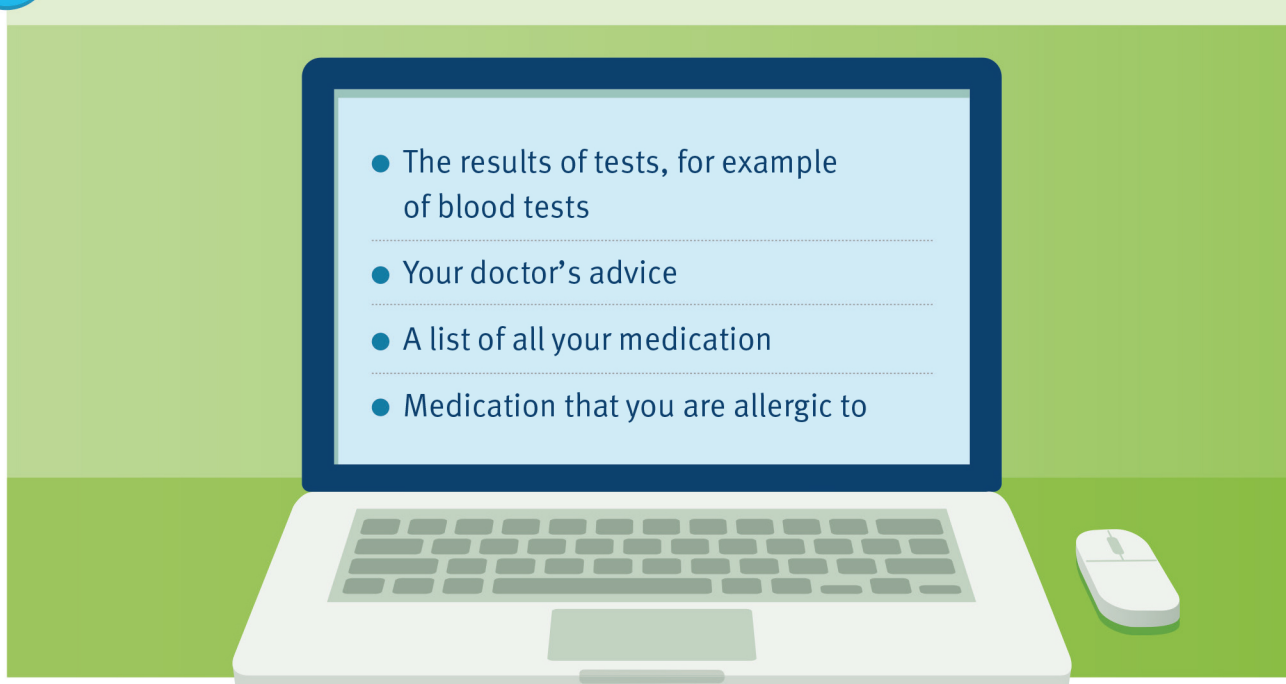

Username

Password

6

After logging in, you can see the following data:

Don't you understand all the medical words?

On www.thuisarts.nl you will find a lot of medical information.
